

Nicole Rivera

Westminster, MD | (904) 608-8113 | rivenf@gmail.com

rivenf.github.io/portfolio

Front End Developer with a background in design and several years of experience in technology education. I am seeking a role that will allow me to leverage my unique combination of skills.

Skills

Front End Development: HTML, CSS, JavaScript, React, jQuery, Bootstrap, WordPress

Art and Design: Figma, Adobe Creative Suite (Photoshop, Lightroom, Illustrator, Premier)

Other software: Microsoft Office (Word, Excel, PowerPoint, Teams)

Experience

Permanent Substitute Teacher

Carroll County Career and Technology Center, Carroll County Public Schools

2023 - Present

Supervised career and technology students during the absence of their regular classroom teacher.

- Supported students in various vocational subjects, including **engineering, cyber operations, video production, biomedical science, and nursing**, by implementing provided lesson plans.

E-Library Specialist

Jacksonville Public Library

2017 - 2021

Promoted digital literacy in the community by teaching computer and technology classes, both in a library setting and also as community outreach. These classes included **web development using HTML and CSS, responsive web design, computer programming using Python, photography, photo editing, 3D modeling and printing, Microsoft Office programs such as Word, Excel and PowerPoint, and basic computer skills.**

- Created lesson plans, example files, and other teaching materials to allow for consistency in lessons between program facilitators.
- Worked with outside organizations to provide access to technology and technology education in underserved neighborhoods.
- Collaborated with other team members to plan and schedule all classes and programs three to six months in advance.
- Worked as part of a team to plan and organize large events that brought thousands of visitors into the library.
- Presented at the 2019 NEFLIN Technology Conference on creating and managing technology class grab-and-go kits that can be used by any instructor in an organization.
- Helped create new procedures for facilitating web-based library programs during closures.
- Presented web-based programs and trainings using Zoom and Microsoft Teams.
- Created video training content to be released online.
- Managed library owned technology equipment inventory.
- Trained new E-Library Specialists in department policies and procedures.

Bakery Clerk

Publix Supermarkets

2013 - 2017

Customer-facing, service oriented role. I worked to keep the bakery shelves full of product and assisted customers in finding what they needed and placing custom orders. I was also cross-trained as a cake decorator, which allowed me to keep my creative design skill sharp.

Education

The Art Institute of Jacksonville

BA in Web Design and Interactive Media

Meta on Coursera

Certificate in Front End Development
